

NOVAmedtek

**NOVAMAG
NT-60**

**Magnetic Incontinence
Therapy Chair**

- **The NOVAmag NT-6o** is a very simple magnetic therapy equipment that delivers pulsed magnetic field to the pelvic floor muscles of an incontinence patient. The pulsed magnetic field depolarizes the pelvic floor nerves and muscles, providing, in essence, pelvic muscle exercises without effort from the patient who is sitting on the treatment chair.
- The patient is able to receive the treatment fully clothed, since the magnetic field passes through clothing and the patient's tissue. The magnetic field is contained in the chair and nothing is attached to the patient or her cloths.
- The equipment is easy to use and there are no known side effects.
- The stimulation therapy carried out by **The NOVAmag NT-6o** can act as a useful addition to conservative therapies for stress and urge incontinence. It is free of complications and does not involve the insertion of an electrode into the patient, as is the case for vaginal and anal electro stimulation. A typical therapy takes 6 weeks with 3 sessions per week. Each session lasts for 20 minutes.

The NOVAmag NT-6o has also proven results in the following symptoms:

- Pelvic pain syndrome
- Chronic prostatitis
- Male and female stress and urge incontinence
- Vaginal toning after delivery
- Erectile dysfunction
- Male and female orgasmic dysfunction
- Faecal incontinence
- Postoperative urinary incontinence

System Features:

- Proven treatment for stress and urge incontinence.
- Non-invasive therapy
- Non-disposable system
- No side effects
- Cost effective
